STEMLink

Field trip for grades 5 & 6

Discover STEMLink!

- At STEMLink, students participate in real-world examples of working in STEM. Students experience three different breakout sessions throughout the day that provide examples of how studying science and math can lead to exciting careers.
- Arrive with an eager mind and leave looking for ways to be even more involved with the future of Science, Technology, Engineering, and Math!

Benefits

- 95% of students agreed that STEMLink provided them with real-world examples of STEM work and workers.
- 90% of students that attended STEMLink said that each session they attended could be described as interesting, hands-on, or challenging.
- 89% of students said that STEMLink helped them understand how studying math and science can lead to exciting careers.

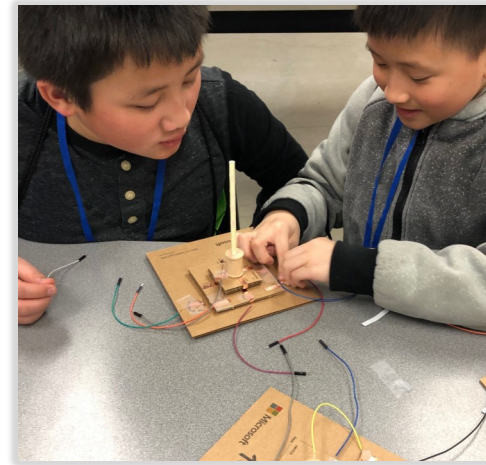

2019 Breakout Sessions included...

- **3D Printing:** Learn the basics of how 3D Printing works from idea to tangible object.
- **Batteries, Bulbs, & Wires:** Shed some light on engineering by constructing electrical circuits.
- **Chemistry:** Explore several hands-on experiments and find out if chemistry is really magic.
- **Dissect an Eye:** Learn how our eyes allow us to see through dissection of a cow eye.
- **Genomics:** Design an edible model of DNA while learning DNA structure and the rules of base pairing.
- **How to Build a Road:** Discover how roads are built with the use of no-bake cookies.

Register Today!

- STEMLink is brought to you by a collaboration between Success Beyond the Classroom & Metro ECSU, which provides cost-effective, high quality educational services to Twin Cities schools & districts. STEMLink is made possible by the additional partnerships of Dunwoody College, Normandale Community College, and Century College.
